At SSI we're commitment to professional, organizational development and measurable results.

As organizations continue to lose market share and profits, executives are coming to the realization that a well *trained, motivated employee* is one of their greatest assets. However training employees is not always so easy. The training needs to be time and cost effective with immediate results, something not every training organization can deliver.

Successful Strategies International (SSI)

is a training, leadership and mentoring organization recognizing the need for quality training and services that are both time and cost effective. For the past 10 years, SSI has been helping organizations develop "successful strategies" for achieving their goals in the business world today. Our unique "blended solution" approach to learning allows for a dynamic and highly effective training experience.

A BLENDED APPROACH TO LEARNING

We do not believe that all employees require the same skill set training or that a generic training program is the solution. That is why we have created a **diverse, customizable curriculum** enabling organizations to choose only the competencies applicable to their business environment. Whether classroom or simulation based training, we give organizations the ability to "target the learning" for faster, more effective results. We can reflect your organization's current employees, products, processes and methodologies so participants walk away with training they can truly apply back on-the-job. Your employees gain only the knowledge they need - how they need it.

Many of our courses feature **online computer simulations**. This learning enables participants to practice and master the simulated business environment before applying these skills in the real world. Computer simulations create a risk free way of running a business without dealing with the consequences.

SSI'S TEAM OF EXPERTS

Scheduling training should not be a nightmare; that is why SSI does all the work for you. You simply provide the training location and **we supply the rest**: logistics, manuals, handouts, tools, even computers if needed.

The best way to gain knowledge is to learn from the experts. Our instructors are **experts in their field** and know the realities of today's marketplace. Participants leave the classroom learning approaches they could only have acquired through years of experience.

And the learning doesn't stop there. After completing a course with SSI we offer **online mentoring**. Participants have the opportunity to contact us with real world issues they are having trouble resolving, and one of our experienced instructors will help guide them through the resolution at no additional charge.

MANAGEMENT SERVICES

If you have a critical project that needs to succeed but find yourself lacking the experience to properly complete the project, you're not alone. In fact, government studies find that only 10% of projects ever finish on time. That is why at SSI we offer Management Services.

This is not a consulting service but rather we work with your organization teaching you the tools and methods needed to attain timely project completion. We can even help set up a Project Management Office (PMO) if your organization currently does not support one. Our intensive **planning and implementation sessions** are customized to your organization so you see first hand how tools and methods are applied on your projects. We help condense completion times, align project teams, create an efficient work plan and identify deliverables all in a time frame and at a pace that works for you. Follow up visits help identify how well the tools and methods are being implemented and what further actions are needed.

REGISTERED EDUCATION PROVIDER

As a **PMI® Registered Education Provider**, our Project Management Courses fully align with the Project Management Institute (PMI®), the recognized authority on project management. For those with Project Management Professional (PMP®) Certifications, many of our courses are registered through PMI® to receive PDU Credits (Professional Development Units). These credits are required for maintaining your certification.

PRESENTATIONS

In addition to our training services, SSI offers educational presentations designed to motivate and rejuvenate learning with proven solutions. Unlike other vendor presentations which are commercial based, we keep our content strictly educational for an informative learning experience. Our presentations are 45 minutes in length and include audience participation and interaction to keep the learning engaging. Presentations have been made at various industry events and meetings around the country.
